

Data Sheet

Strainer Type **FIA**

Easy to install, and ensures quick strainer inspection and cleaning

FIA strainers are a range of angleway and straightway strainers, which are carefully designed to give favourable flow conditions. The design makes the strainer easy to install, and ensures quick strainer inspection and cleaning.

FIA strainers are used ahead of automatic controls, pumps, compressors etc., for initial plant start-up and where permanent filtration of the refrigerant is required. The strainer reduces the risk of undesirable system breakdowns and reduces wear and tear on plant components.

FIA strainers are equipped with a screen mesh of stainless steel, available in sizes 100, 150, 250 and 500 μ (microns), (US 150, 100, 72, 38 mesh⁽¹⁾).

¹ Mesh is the number of threads per inch. μ (microns) is the distance between two threads ($1\mu = 1/1000$ mm).

Features

- Modular Concept:
 - Each valve housing is available with several different connection types and sizes.
 - Possible to convert FIA strainers to any other product in the Flexline™ SVL family (shut-off valve, hand operated regulating valve, check & stop valve or check valve) just by replacing the complete top part.
- Fast and easy overhaul service. It is easy to replace the top part and no welding is needed.
- Filter net of stainless steel mounted direct without extra gaskets means easy servicing.
- Two types of strainer inserts are available:
 - A plain insert of stainless steel.
 - A pleated insert (DN 15-200) with extra large surface, which ensures long intervals between cleaning and low pressure drop.
- FIA 15-40 (½ – 1 ½ in.): A special insert (50µ) can be used in combination with a standard version when cleaning a plant during commissioning.
- FIA 50-200 (2 - 8 in.): A large capacity filter bag (50µ) can be inserted for cleaning plant during commissioning.
- FIA 80-200 (3 - 8 in.) can be equipped with a magnetic insert for detention of iron particles and other magnetic particles.
- Each strainer clearly marked with type, size and performance range.
- Housing and bonnet of low temperature steel in accordance with the requirements of the Pressure Equipment Directive and those of other international classification authorities.
- Classification: DNV, CRN, BV, EAC etc. To get an updated list of certification on the products please contact your local Danfoss Sales Company.

Media

Refrigerants

Applicable to HCFC, HFC, R717 (Ammonia) and R744 (CO₂) and all flammable refrigerants. For further information refer to the product instruction for FIA.

New refrigerants

Danfoss products are continually evaluated for use with new refrigerants depending on market requirements.

When a refrigerant is approved for use by Danfoss, it is added to the relevant portfolio, and the R number of the refrigerant (e.g. R513A) will be added to the technical data of the code number. Therefore, products for specific refrigerants are best checked at store.danfoss.com/en/, or by contacting your local Danfoss representative.

Product specification

Pressure and temperature data

Table 1: Pressure and temperature data

Features	Description
Temperature range	-60 °C/+150 °C (-76 °F/+302 °F).
Max. working pressure	52 bar(g) (754 psig)

Design

Figure 1: Example of marking ring, FIA

Strainer Insert

A filter grid and filter net of stainless steel ensure long element life. The filter net offers a very high degree of cleanability.

Housing

The strainer housing is made of special, cold resistant steel.

Installation/Maintenance

The strainer is designed to resist high internal pressures. However, the piping system in general should be designed to avoid liquid traps and reduce the risk of hydraulic pressure caused by thermal expansion. Install the strainer with the cover in downward position.

Danfoss recommends replacement/cleaning of the strainer when the differential pressure loss >0.5 bar (7.3 psi) in the liquid line and >0.05 bar (0.7 psi) in the suction line. The max. permissible differential pressure is 1 bar (15 psi). For further information refer to installation instruction for FIA.

Selection of strainer size

Definition

Mesh is the number of threads per inch. μ (microns) is the distance between two threads ($1\mu = 1/1000$ mm).

The mesh aperture size of the strainer must satisfy the requirements stated by the suppliers of the equipment to be protected. The following recommendations of aperture size apply in general to refrigeration installations:

All lines

First start up : 50 μ (Use strainer element with removable insert for FIA DN15-40 or separate filter bag for FIA DN 50-200. 50 μ insert should normally be removed after the first 24 hours of operation).

Liquid Lines

- Ahead of pumps: 500 μ [38 mesh]
- After pumps: 150 μ [100 mesh] / 250 μ [72 mesh]
- In front of AKVA valves: 100 μ [150 mesh]

Protection of automatic regulation equipment

Strainer, type FIA

Generally : 150 μ [100 mesh] / 250 μ [72 mesh] Sensitive equipment
e.g. suction regulators with low temperature : 250 μ [72 mesh]

Suction Lines

Ahead of screw compressor : 250 μ [72 mesh]

Ahead of piston compressor : 150 μ [100 mesh]

NOTE:

Weight shown in tables 12-16 is approximated.

Ordering

The table below is used to identify the strainer required. Please note that you have to order **FIA strainer without insert, a strainer insert and accessories**.

Example:

FIA 50 D ANG + FIA-X 50 150µ Strainer insert + Filter Bag = **148H5912 + 148H3130 + 148H3150**

- **D** = Butt-weld DIN
- **ANG** = Angleway
- **A** = Butt-weld ANSI
- **STR** = Straightway
- **SOC** = Socket welding
- **FPT** = Inside pipe thread
- **G** = Butt-weld GOST
- **ANG** = Angleway
- **STR** = Straightway

Table 21: Butt-weld DIN (EN 10220) - Angleway

Blind nut with gasket		148H3450
Special strainer element permanent 50µ for CO ₂ applications	FIA 15-20	032F9113 ⁽¹⁾

⁽¹⁾ The 2 O-rings which come together with the strainer element should not be used for strainer installation in the FIA 15-20.

NOTE:

Please note that the 50µ strainer element can be filled up quite fast, so it is recommended to inspect and clean the strainer element at regular intervals based on experience at the installation site.

Certificates, declarations and approvals

The list contains all certificates, declarations, and approvals for this product type. Individual code number may have some or all of these approvals, and certain local approvals may not appear on the list.

Some approvals may change over time. You can check the most current status at danfoss.com or contact your local Danfoss representative if you have any questions.

Pressure Equipment Directive (PED)

FIA strainers are approved in accordance with the European standard specified in the Pressure Equipment Directive and are **CE** marked. For further details/restrictions - see [Installation guide](#).

Table 38: Pressure Equipment Directive (PED)

	Nominal bore	DN ≤ 25 (1 in.)	DN 32-80 mm (1¼ - 3 in.)	DN 100-200 mm (4-8 in.)
	Classified for	Fluid group I		
	Category	Article 3, paragraph 3	II	III

Online support

Danfoss offers a wide range of support along with our products, including digital product information, software, mobile apps, and expert guidance. See the possibilities below.

The Danfoss Product Store

The Danfoss Product Store is your one-stop shop for everything product related—no matter where you are in the world or what area of the cooling industry you work in. Get quick access to essential information like product specs, code numbers, technical documentation, certifications, accessories, and more.

Start browsing at store.danfoss.com.

Find technical documentation

Find the technical documentation you need to get your project up and running. Get direct access to our official collection of data sheets, certificates and declarations, manuals and guides, 3D models and drawings, case stories, brochures, and much more.

Start searching now at www.danfoss.com/en/service-and-support/documentation.

Danfoss Learning

Danfoss Learning is a free online learning platform. It features courses and materials specifically designed to help engineers, installers, service technicians, and wholesalers better understand the products, applications, industry topics, and trends that will help you do your job better.

Create your Danfoss Learning account for free at www.danfoss.com/en/service-and-support/learning.

Get local information and support

Local Danfoss websites are the main sources for help and information about our company and products. Find product availability, get the latest regional news, or connect with a nearby expert—all in your own language.

Find your local Danfoss website here: www.danfoss.com/en/choose-region.

Spare Parts

Get access to the Danfoss spare parts and service kit catalog right from your smartphone. The app contains a wide range of components for air conditioning and refrigeration applications, such as valves, strainers, pressure switches, and sensors.

Download the Spare Parts app for free at www.danfoss.com/en/service-and-support/downloads.

Coolselector®2 - find the best components for you HVAC/R system

Coolselector®2 makes it easy for engineers, consultants, and designers to find and order the best components for refrigeration and air conditioning systems. Run calculations based on your operating conditions and then choose the best setup for your system design.

Download Coolselector®2 for free at coolselector.danfoss.com.
